## Digital Designer

I have over 5 years experience working for digital agencies in London. I've done some solid work on platform design as well as campaigns. I studied Fine Arts in Barcelona, which turned me into a scamping-first designer. Concepting is what drives my work and I love creating visual systems from scratch. I enjoy collaborative environments that allow me to work across disciplines: UX, UI, Branding, Typography, Illustration and Data Visualisation.

### **Google, Brand Studio**
